## Syllabus for Screening Test for rectt. to the post of **Technical Officer(Textiles)**in the Directorate of Textiles (Handloom etc.) under the Department of M.S.M.E & <u>Textiles, Govt. of W.B.</u>[Advt. No. 04/2024]

| Topic                | Sub-Topic  |  |
|----------------------|--|--|
| Fibre Science        | Classification of textile fibre on basis of its source/origin<br>NATURAL FIBRE<br>Cotton Fibre<br>Commercial varieties of cotton; Physical properties of cotton; Chemical Properties<br>of cotton;<br>Brief study of uses of cotton<br>Bast Fibre (extraction process and different uses)<br>Jute; Flax, Ramie; Hemp<br>Silk<br>Rearing, Reeling and Throwing of silk fibre; Degumming of silk fibre; Physical<br>and chemical properties of silk fibre; Different uses of wool fibre<br>Wool<br>Physical and chemical properties of wool.<br>MANMADE FIBRE<br>Viscose, Polyester, Nylon and acrylic<br>Raw materials Physical and chemical properties Uses  |  |
| Weaving&<br>Knitting | Outline of weaving processDefinition of weaving, common weaving terms; Classification of loomsPrimary, secondary & auxiliary motions of weaving; Functions & uses ofvarious important loom parts & accessoriesHandloomType of handloom;Fly shuttle frame loom; Semiautomatic looms; Tie up of healdsPowerloomTypes of powerloom; various shuttleless picking mechanism such as, rapier,gripper,air jet and water jet.WindingObject of warp & weft winding; Cone winding machine-mechanism & workingPrinciple; Pirn winding machine-mechanism & working principleWarpingObject of warping; Beam warping machine-mechanism & working principles;Sectional warping machine-mechanism & working principles;Sectional warping machine-mechanismType of picking mechanismType of picking mechanism & working principles;Beating up mechanismThe motion of the sley; Eccentricity of sleys motion & its effectSecondary motionTake up motion & its type; Seven wheel take up motion; Let off motion & its type;Negative & positive let off mechanism. |  |

|           | Sizing   |  |  |
|-----------|--|--|--|
|           | Object of sizing; Study of sizing ingredients & their function: Preparation of   |  |  |
|           | sizing paste: Sizing machine-mechanism & working principles  |  |  |
|           | Dobby Loom   |  |  |
|           | Principles of dobby shedding: Types of dobby: Timing & setting of dobby:   |  |  |
|           | Common defects of dobby sources & remedies   |  |  |
|           | Locauard Loom  |  |  |
|           | Deligate & grinoiales of increased sheddings Types of increased. Timing and  |  |  |
|           | Objects & principles of Jacquard shedding; Types of Jacquard; Timing and   |  |  |
|           | setting of Jacquard loom; Study of different system of harness mountiong and   |  |  |
|           | harness ties; Study of working of piano card cutting machine card lacing and   |  |  |
|           | their mounting   |  |  |
|           | Fabric Defects   |  |  |
|           | Common fabric defects, causes and their remedies   |  |  |
|           | Calculation related to cost of fabrics   |  |  |
|           | Knitting   |  |  |
|           | Types of Knitted fabrics and their applications.   |  |  |
|           |  |  |  |
|           | Plain weave & its derivatives  |  |  |
| Fabric    | Plain weave: Warn rih weaves: Mat weaves   |  |  |
| Structure | Twill weave & its derivatives  |  |  |
| Structure | Characteristics of twill weave: Construction of twill weave: Rearranged twill  |  |  |
|           | Combined twill: Broken twill: Diamond twill: Influence of twist direction &  |  |  |
|           | combined twill, broken twill, Diamond twill, finitence of twist direction &  |  |  |
|           | circulate and the Repeatation for the second s   |  |  |
|           | Simple toweling & curtain fabrics  |  |  |
|           | Ordinary honey comp design; Double stitched ordinary honey comp; Straight  |  |  |
|           | draft honey comp; Brighten honey comp  |  |  |
|           | Yarn numbering system  |  |  |
|           | Indirect system of numbering of yarn; Direct system of numbering of yarn   |  |  |
|           | Resultant count of folded yarn; Conversion of count of yarn  |  |  |
|           | Heald count & reed count   |  |  |
|           | Difference system of heald count; Different system of reed count   |  |  |
|           | Bedford cord & Pique design  |  |  |
|           | Plain faced Bedford cord design produced by pair of picks; Plain faced   |  |  |
|           | Bedford cord design produced by alternative picks; Twill face Bedford cord;  |  |  |
|           | Extra warp and extra weft figuring; Cross over the spot figures; Loose back and  |  |  |
|           | fast back pique  |  |  |
|           | Warp pile fabric   |  |  |
|           | Construction of different types of terry pile fabrics-3 pick 4 pick 5 pick & 6 pick  |  |  |
|           | terry nile: Weaving mechanism for producing terry nile structure   |  |  |
|           | Weft nile fahric   |  |  |
|           | Velveteen: Plain back velveteen: Twill back velveteen: Length of nile: Density of  |  |  |
|           | nile. East nile structure  |  |  |
|           | Back cloth design  |  |  |
|           | Duringing of the set o |  |  |
|           | heady Deversible heads dethy Ware we deled with heads dethy Warp back; Wett  |  |  |
|           | back; keversible back cloth; warp wadded weft back cloth; weft wadded warp   |  |  |
|           |  |  |  |
|           | Double cloth   |  |  |
|           | Classification of double cloth; Self stitched double cloth; Centre stitched double   |  |  |
|           | cloth; Thread interchange double cloth; Cloth interchanged double cloth; One side  |  |  |
|           | binding double cloth; Both side double cloth   |  |  |
|           | Gauze & Leno weaving   |  |  |
|           | Introduction of gauze & leno structure; Construction of doup healds & its uses   |  |  |

|                      | Gauze & leno design; drafting, lifting plan & types of sheds<br>Yarn & cloth calculation<br>Influence of yarn diameter on cloth setting rules; Determination of cover factor &<br>cloth particulars<br>Jacquard designs<br>Construction of jacquard design for side border & all over effect e.g.<br>Bisymmetrical & multi symmetrical design; Different stages for transferring a<br>small motif of the fabric; Arrangement of figured in jacquard design like-unit<br>repeat drop principle satin<br>Analysis of woven fabrics<br>Identification of warp and weft; Brief discussion about the analysing procedures<br>Calculation of weight of warp & weft<br>Extra Warp and Extra Weft Designs   |
|----------------------|---|
| Textile<br>Chemistry | <ul> <li>Dyeing</li> <li>Classifications of dyestuff according to methods of application; Determination of water hardness; Scouring of cotton yarn; Bleaching of cotton yarn; Mercerization;Dyeing with Azofree dyes,</li> <li>Basic &amp; Acid dye-general characteristics and methods of application; Reactive, Vat and Sulphur dye-general characteristics and methods of application.</li> <li>Combined scouring and bleaching of cotton &amp; jute; jute bleach for white and use; Dyeing of jute materials; Dyeing of Silk; A brief study of some vegetable colour and their methods of application, Azo Free Dyes.</li> <li>Colour Fastness-washing, light, rubbing, perspiration, sublimation.</li> <li>Printing</li> <li>Preparation of cotton for printing. Common Printing paste ingredients and their functions, Various method and styles of printing direct discharge.</li> <li>Preparation of printing pastes with different dyestuff some common faults in printing and their rectifications.</li> <li>Sustainable Chemical Processing of Textiles.</li> </ul>  |
| Textile<br>Testing   | Moisture and Textiles<br>Effect of moisture on textile processing and testing. Definition of absolute and<br>relative humidity, moisture content& moisture regain and their relationship study<br>of the methods for Determinations of-relative humidity by wet & dry bulb<br>hygrometer and Moisture content& moisture regain by conditioning oven &<br>Shirley moisture meter<br>Yarn Number<br>Principle involved in determination of yarn number Determination of yarn<br>number from yarn&cloth. Use of instruments for determination of yarn<br>numberknowledge balance. Quadrant balance and Beasley balance<br>Yarn Twist<br>Effect of twist on the quality of yarn and fabrics; Optimum twist and its<br>essentiality Determination of twist of single and ply yarn<br>Yarn Strength Testing<br>Principle of difference methods; Study of yarn strength testing instruments-<br>LeaTester, Single thread twister, Ballistic tester<br>Yarn evenness<br>Meaning of random variation, periodic variation, shortmedium and long term<br>variation.<br>Index of irregularity in evenness determination Measurement of yarn evenness<br>by-Back Board Test, Fielden Walker Test |

|  | Fabric Testing  |
|--|---|
|  | Determination of fabric testing related to Thickness Weight CrimpStudy of tear,     |
|  | tensile, burstingand abrasion properties of fabric. Air and water permeability test |
|  | Crease Resistance and Crease Recovery.  |
| Environment  | General concept   |
| and  | Nature and scope of environmental problems  |
| Pollution  | Environmental Pollution   |
| Management Water pollution-types sources and their effects Occupational health-hazar |   |
|  | related handloom industry process, various sources of water in wet processing,      |
|  | characteristics of waste water conservation   |
|  | Pollution Monitoring and control  |
|  | Principles and methods of waste water treatments, design of effluent treatments     |
|  | plant and disposal of water, Essential properties of Waste water such as,           |
|  | BOD,COD, TDS, pH, TSS,Turbidity etc.  |
| Technical  | Definition & classifications of Technical Textiles, High Performance fibers,        |
| Textiles and   | Definition, classifications of Nonwovens.   |
| Nonwovens  |   |
| English  | Basic Grammar [Madhyamik Standard]  |
| Arithmetic &   | General Awareness,  |
| General  | Arithmetic – Madhyamik Standard   |
| Awareness  |   |

## N.B.:-

The Syllabus is indicative only, candidates should be prepared to answer any question from essential qualification/degree mentioned in the advertisement for the relevant post.

Scheme for Screening Test for rectt. to the post of Technical Officer(Textiles) in the Directorate of Textiles (Handloom etc.) under the Department of M.S.M.E & Textiles, Govt. of W.B.[Advt. No. 04/2024]:-

- Screening Test will be objective type (MCQ) in 4 different series, viz., A, B, C & D.
- Number of questions: 100, each carrying 1 mark.
- ➤ Full marks: 100.
- Duration: 1 hour 30 minutes.
- **N.B.:-** There will be **negative marking** for each wrong answer as per norms (**1/4**<sup>th</sup> of the marks for each wrong answer).

## Multiple choice objective type questions on:-

| (i)   | Textile Technology & Handloom                       | – 75 marks |
|-------|---|------------|
|       | Technology and Textile Chemistry [Diploma Standard] |            |
| (ii)  | English [Basic Grammar - Madhyamik Standard]        | – 15 marks |
| (iii) | General Awareness & Arithmetic                      |            |
|       | [Arithmetic - Madhyamik Standard]                   | – 10 marks |
